# Managing Road Safety the BHARAT Way

From **Vision Zero** to **Net Zero Growth** in Fatalities

---

**Venkata Chunduru**

**Director & Head India Operations**

**ARCADIS (IBI) Group**

# THE REALITY CHECK: India Road Safety Crisis

**Road Safety = Human Suffering at Scale. National Development Crisis**

## 1. Driver Stress – The Invisible Risk

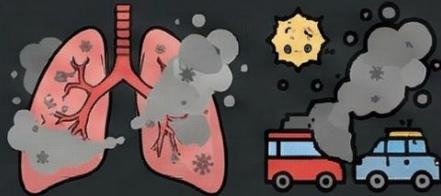

### Causes for Drivers:

- **Bus, Cab, Truck:** Fatigue, Congestion, Income Pressure
- **Commuters:** Unpredictability, Aggression

**IMPACTS:** Mental Exhaustion, Fatigue-Related Mistakes, Reduced Reaction Real Time. Stress becomes a safety hazard.

## 2. Community Health Impact

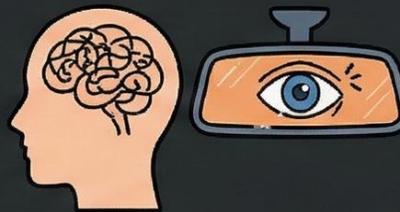

### Road Corridors Expose Citizens to:

- Air Pollution
- Particulate Matter
- Respiratory Illness
- Cardiovascular Disease

Children & Elderly near roads face continuous exposure.  
**Road safety is Environmental Health Management.**

## 3. Psychological Burden

- Daily Fear of Crashes
- Near-miss Experiences
- Congestion Frustration

**REDUCES:** Quality of Life, Trust in Public Systems.

## 4. Social & Family Impact

### Behind Every Fatality:

- Families lose lose-breadwinners
- Children lose educational support
- Long-term economic hardship.

## 5. Economic Cost of Loss of Life

### Road Fatalities Represent:

- Loss of Productive Workforce
- Medical & Rehabilitation Costs
- Insurance & Legal Burdens
- Long-term Dependency

At national scale, road crashes is an **ECONOMIC COMPETITIVENESS ISSUE.**

**CORE FRAMING LINE:** This is not just a transport problem. It is a public health crisis, an economic loss, and a social suffering issue. Managing road safety is national risk management.

**MEDIA SOUNDBITE:** "Our roads are creating stress, sickness, and economic loss every day. Road safety is about protecting human life and national productivity."

# RATIONALE FOR TRANSFORMATION: LESSONS FROM FIVE NATIONAL EXPERIENCES

### 1. NEW YEAR'S EVE SAFETY OPERATIONS (Bengaluru, 2026-2026)

**KEY INSIGHT:** Prevention depends on prediction

Coordinated monitoring, enforcement, preparedness controlled predictable risks. Need for continuous surveillance and predictive intelligence.

### 2. COVID PUBLIC BEHAVIOURAL CAMPAIGNS

**KEY INSIGHT:** A few simple, actionable commitments drive mass compliance

- Always wear
- Never drive under influence
- Do not use phone

Clarity, repetition, simplicity enable widespread adherence. Focus on high-impact behavioural commitments.

### 3. AVIATION SAFETY & CRASH INVESTIGATION SYSTEMS

**KEY INSIGHT:** Safety improves through continuous monitoring, control, and learning

Implement Road Traffic Control (RTC) model with real-time visibility and a learning loop.

### 4. FRAGMENTED EXCELLENCE CANNOT DELIVER SYSTEMIC OUTCOMES

**KEY INSIGHT:** Collaboration is essential

**COMMON DIGITAL PLATFORM**

Isolated initiatives fail. A unified platform is crucial for scaling outcomes.

### 5. CLARITY OF DUTY – SWADHARMA AND RAJDHARMA IN ROAD SAFETY

**KEY INSIGHT:** Road safety improves when responsibilities are not diffused, but clearly defined.

**Swadharma (Individual Duty):** Each actor performs their defined role with commitment.

**Rajdharma (State Duty):** The state has a core obligation to protect citizen life and welfare through safe mobility.

**TAKEAWAY:** Shift from procedural compliance to duty-based responsibility. Clear ownership of outcomes and defined accountability for preventable fatalities.

## THE BHARAT WAY: ACHIEVING IMPACT AT SCALE

**A SYSTEMIC, INTELLIGENCE-LED, COLLABORATIVE, AND DUTY-DRIVEN FRAMEWORK**

The city traffic police booked 330 motorists who were found driving under the influence of alcohol on Sunday night and early Monday morning. The traffic police checked over 7,620 vehicles across the city.

Till midnight on Sunday, one fatal and 10 non-fatal accidents were reported. On Monday between midnight and 7 am, three fatal accidents were reported.

Between 31-12-2024 7:00 PM to 01-01-2025 7:00 AM :  
**4 Non-fatal** accidents reported

In NYE-2025: **73%** decrease in accident rate compared to NYE-2024

New Year Eve 2023	31st Dec 2022	1st Jan 2023	31st Dec 2022 7 PM to 1st Jan 2023 7 AM
Total Accident	22	24	23
Fatal Accident	1	5	4
Fatality Rate	5%	21%	17%

New Year Eve 2024	31st Dec 2023	1st Jan 2024	31st Dec 2023 7 PM to 1st Jan 2024 7 AM
Total Accident	2	21	15
Fatal Accident		3	1
Fatality Rate	0%	14%	7%

New Year Eve 2025	31st Dec 2024	1st Jan 2025	31st Dec 2024 7 PM to 1st Jan 2025 7 AM
Total Accident	4	6	4
Fatal Accident			
Fatality Rate	0%	0%	0%

# 0 (ZERO) FATALITY DURING NYE'25

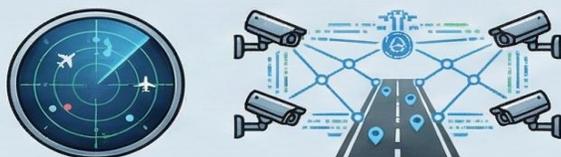

# INDIA ROAD SAFETY MISSION: A Systemic, Coordinated National Approach

**TARGET: Zero Fatalities** (Project Level) | **Net Zero Incremental Growth** (National & State Level)

### 1 SURVEILLANCE — “Seeing the Risk”

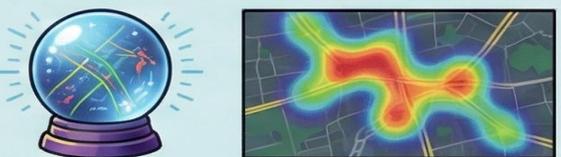

**ATC Equivalent:**  
Radar tracking aircraft

**RTC Role:**  
Continuous visibility of road conditions

- Corridor and junction monitoring
- Speed pattern tracking
- Wrong-way movement detection
- Stalled vehicles
- Congestion build-up
- Work-zone risks
- Weather alerts

*“You cannot manage safety without real-time visibility.”*

### 2 PREDICTION — “Anticipating the Conflict”

**ATC Equivalent:**  
Aircraft conflict prediction

**RTC Role:**  
Identifying where risk will rise

- Crash probability heatmaps
- Seasonal risk modelling
- Festival and migration travel spikes
- Behavioural violation trends
- Blackspot emergence detection

*“The safest crash is the one we prevent before it forms.”*

### 3 CONTROL & GUIDANCE — “Managing Movement”

**ATC Equivalent:**  
Flight path separation rules

**RTC Role:**  
Actively shaping traffic behaviour

- Adaptive traffic signals
- Speed management systems
- Variable Message Signs
- Lane discipline enforcement
- Construction zone safety protocols
- Dynamic diversions

*“Safety is not only enforcement — it is guidance.”*

### 5 LEARNING LOOP — “Improving the System”

**ATC Equivalent:**  
Aviation incident investigation

**RTC Role:**  
Every crash improves the system

- Scientific crash reconstruction
- Root cause analytics
- Engineering corrections
- Policy refinement
- Awareness targeting
- AI-based training updates

*“Safety improves when systems learn.”*

### 4 INCIDENT COMMAND — “When Prevention Fails”

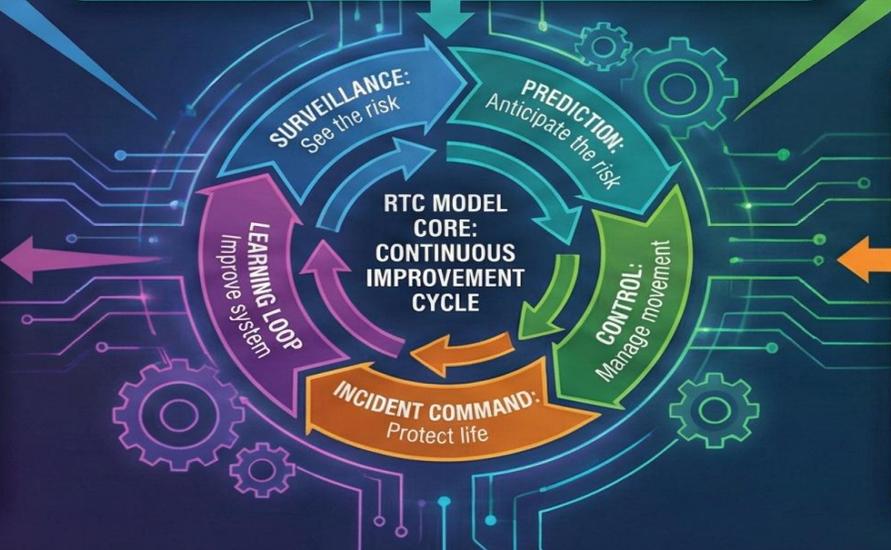

**ATC Equivalent:**  
Emergency aircraft handling

**RTC Role:**  
Golden Hour survival management

- Automatic incident detection
- Fast verification
- Nearest ambulance dispatch
- Hospital capacity assignment
- Route clearance
- Real-time coordination

*“Speed of response determines survival.”*

Venkat Chunduru

**THE ARCADIS STRATEGIC SHIFT**

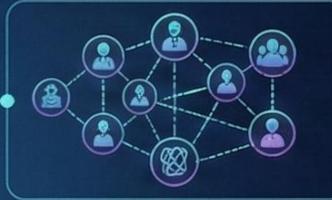

# NATIONAL ROAD SAFETY INTELLIGENCE PLATFORM: THE 'NERVOUS SYSTEM' OF THE BHARAT WAY

**PURPOSE:** To transform road safety from fragmented actions into a coordinated national intelligence system by connecting: **Authorities + Police + Health + NGOs + Academia + Industry + Citizens**

- TRAFFIC SURVEILLANCE** (Video feeds, violations)
- HIGHWAYS ATMS** (Incidents, congestion, speeds)
- URBAN SIGNALS** (Flow patterns, delays)
- AMBULANCE SYSTEMS** (Response time, routing)
- HOSPITALS** (Trauma data, injury severity)
- e-DAR / IRAD** (Crash records)
- CITIZENS** (Hazard reporting)
- NGOs & RESEARCH** (Studies, behavioural data)
- WEATHER SYSTEMS** (Fog, rain, heat)
- ROAD ASSETS** (Blackspots, geometry)

## ARCADIS LAYER 1 — DATA INTEGRATION LAYER (The Nerve System)

- BEHAVIOUR ANALYTICS** (Helmet, speeding, violations)
- INCIDENT PREDICTION** (Predicts crash probability)
- RESPONSE OPTIMIZATION** (Best ambulance dispatch)

### LAYER 5 — GOVERNANCE LAYER (The Mission Control)

<b>PROJECT</b> Zero fatality compliance	<b>CORRIDOR</b> Monthly risk trends	<b>DISTRICT</b> Fatality movement	<b>STATE</b> Net zero incremental deaths	<b>NATIONAL</b> Comparative performance
--	--	--------------------------------------	---	--

### LAYER 4 — COLLABORATION LAYER (The Ecosystem Platform)

<b>AUTHORITIES</b> (Shared dashboard)	<b>NGOs</b> (Awareness targeting data)	<b>ACADEMIA</b> (Research access)	<b>INDUSTRY</b> (CSR safety projects)	<b>CITIZENS</b> (Hazard reporting + alerts)
--	---	--------------------------------------	--	--

Everyone works on same intelligence.

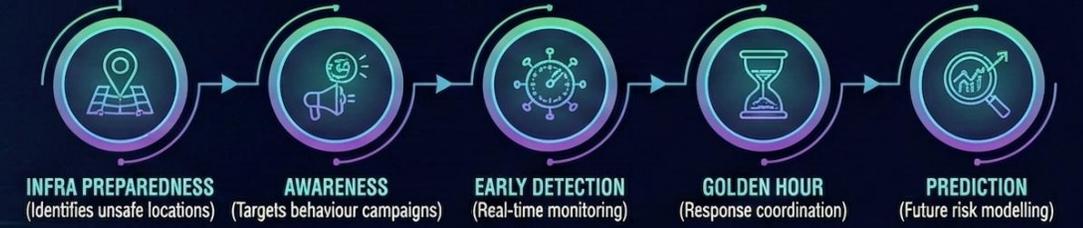

### LAYER 3 — OPERATIONAL LAYER (The Action Engine)

<b>POLICE</b> (Targeted enforcement)	<b>ROAD AGENCIES</b> (Infrastructure fixes)	<b>TRANSPORT DEPT</b> (Policy decisions)
<b>HEALTH DEPT</b> (Trauma preparedness)	<b>NGOs</b> (Awareness targeting)	<b>DISTRICT ADMIN</b> (Local interventions)

## KEY PLATFORM FEATURES

- ✓ National + State + District dashboards
- ✓ Blackspot auto-detection
- ✓ Golden hour response tracking
- ✓ Predictive risk heatmaps
- ✓ Citizen reporting app integration
- ✓ Construction zone monitoring
- ✓ Repeat offender analytics

## HOW THIS SUPPORTS YOUR 5-PRONGED PREVENTION

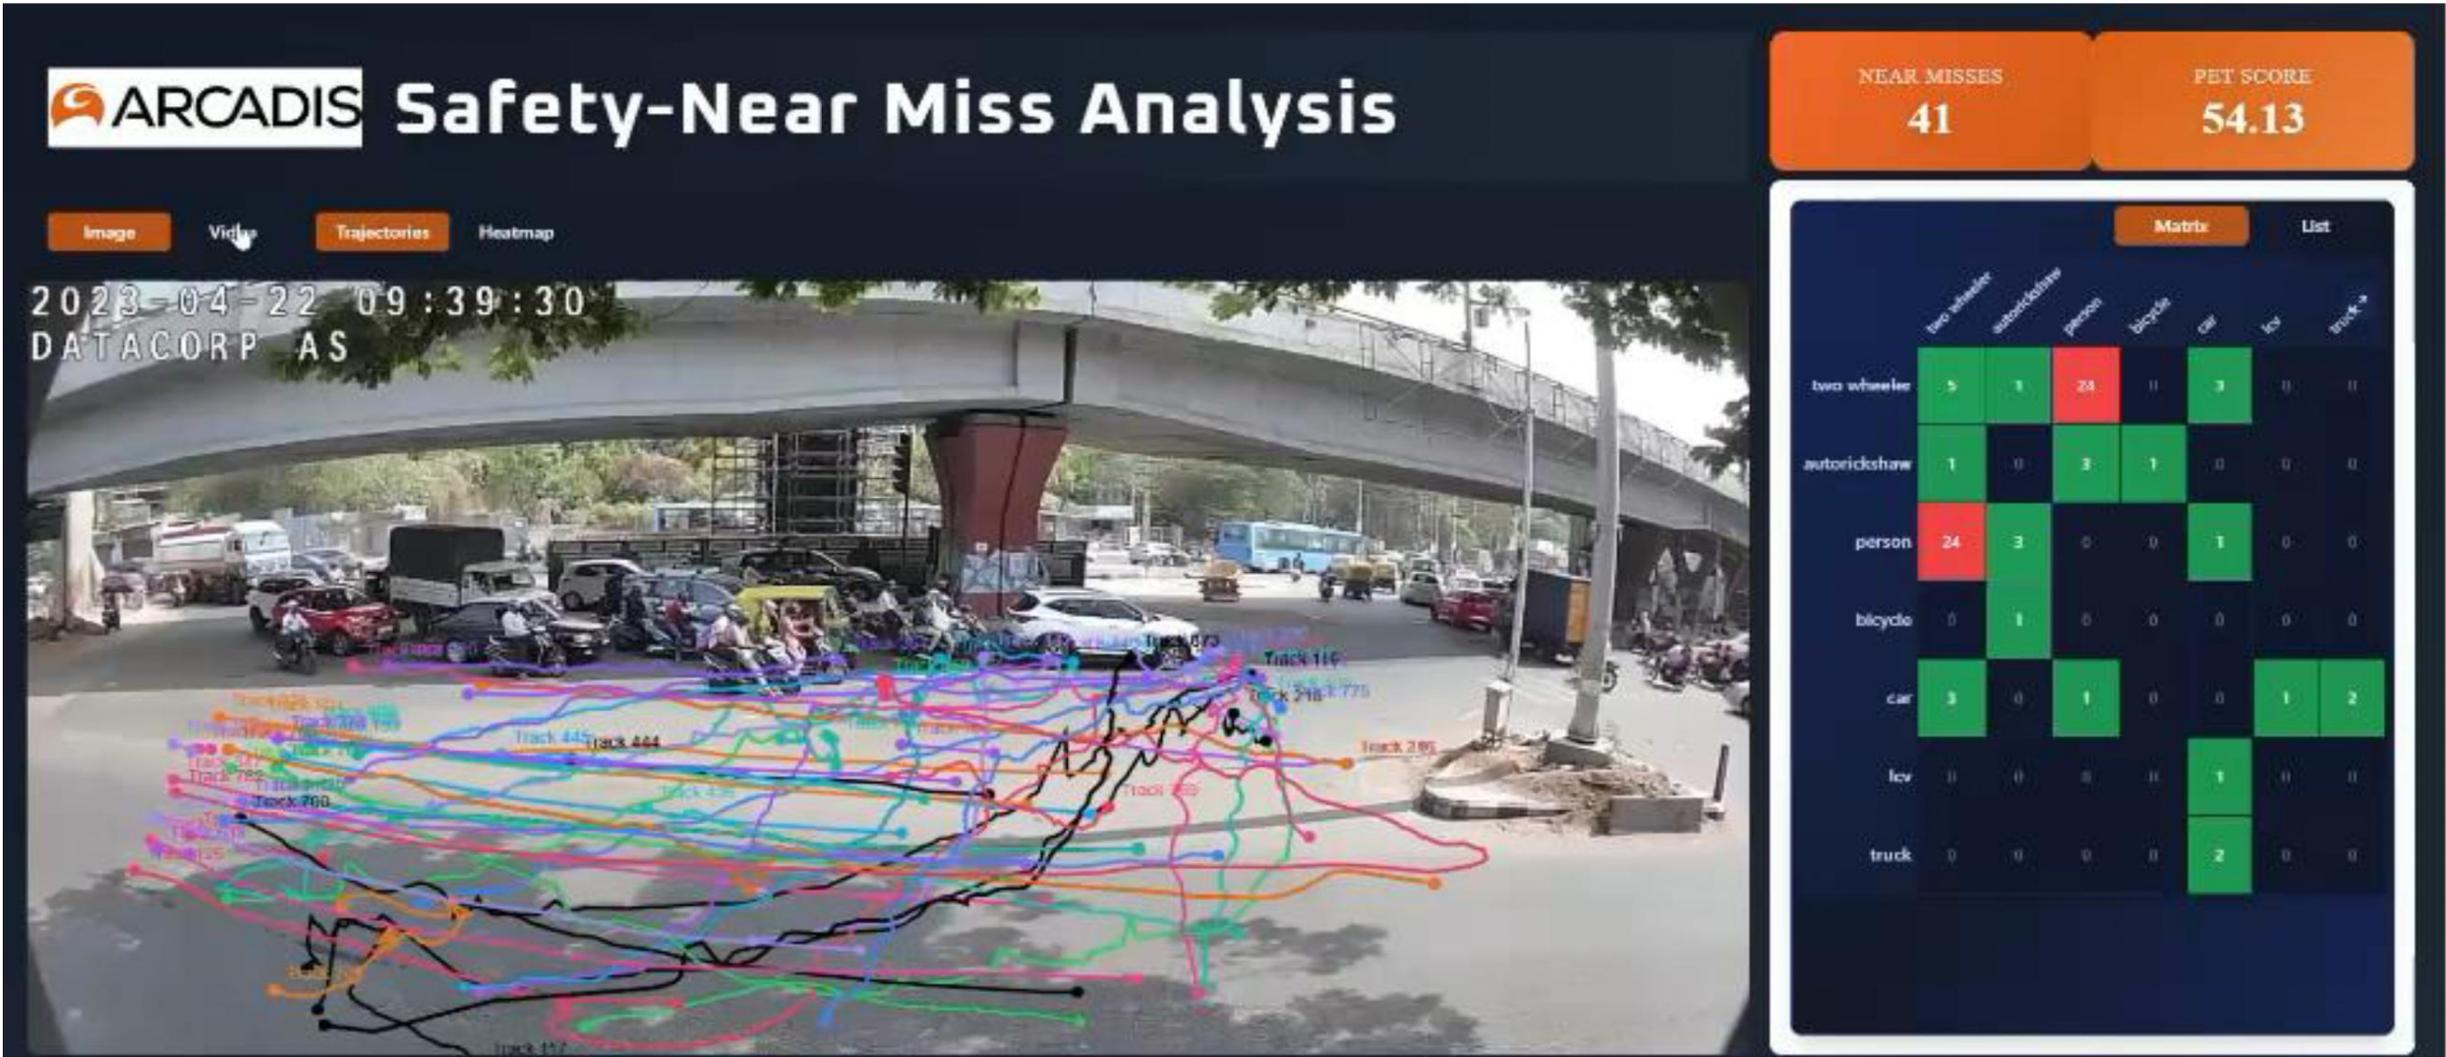

## BIG SHIFT THIS PLATFORM BRINGS

<p><b>TODAY</b></p> <ul style="list-style-type: none"> <li>• Siloed departments</li> <li>• Reactive</li> <li>• Annual review</li> <li>• Data after crash</li> </ul>		<p><b>WITH PLATFORM</b></p> <ul style="list-style-type: none"> <li>• Connected ecosystem</li> <li>• Predictive</li> <li>• Monthly intelligence</li> <li>• Data before crash</li> </ul>
---	--	--

“Road safety cannot be managed by files and meetings. It must be managed like air traffic control — with a shared digital intelligence platform connecting every stakeholder in real time.”

Venkat Chunduru

Transforming junctions from accident-prone conflict points into intelligently managed safety zones, identifying risks before crashes occur and enabling timely interventions..

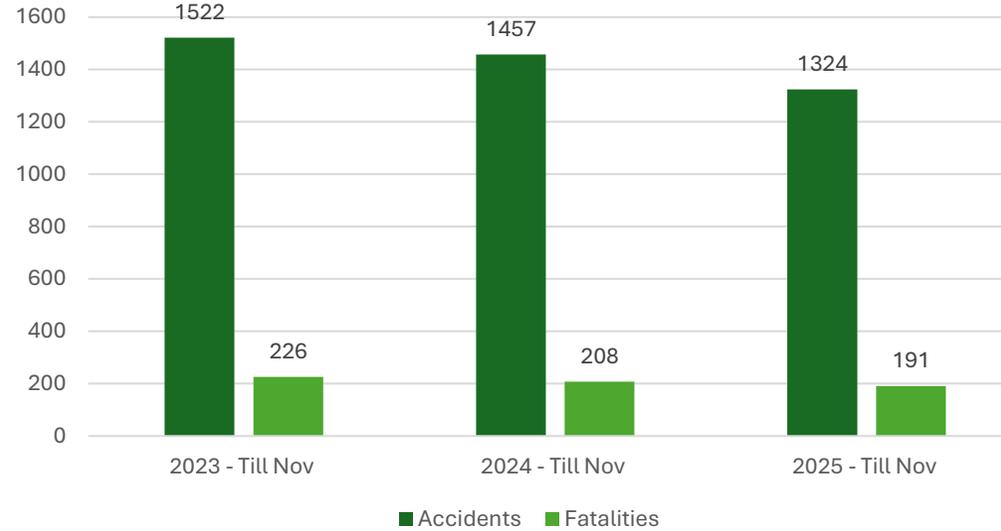

# Safety Impact of New ATSC Traffic Signals at 169 Junctions

**13%** reduction in Total Accidents

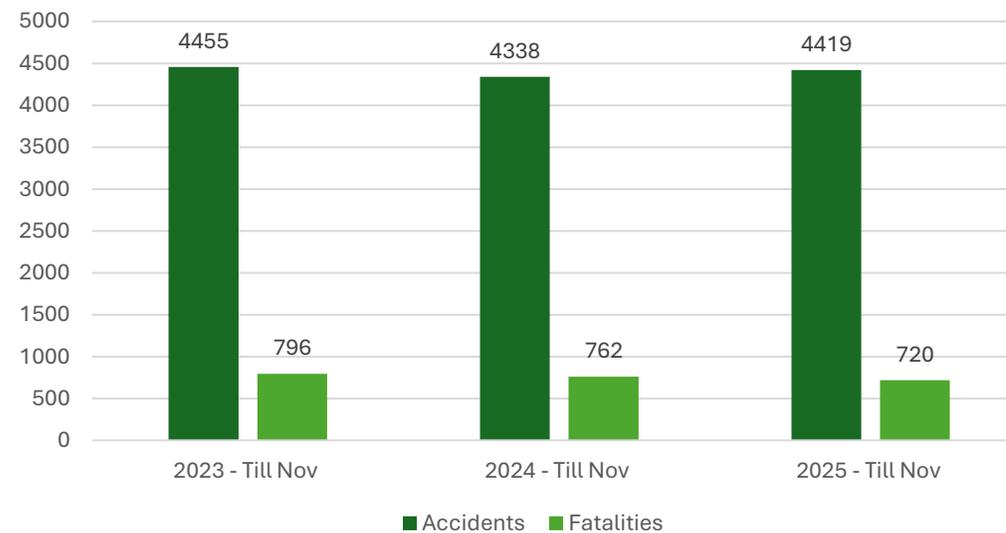

**15%** reduction in Fatal Accidents

Accidents & Fatalities - **ATCS Implemented Areas**

Accidents & Fatalities - Across Bengaluru City

# ROAD SAFETY GOVERNANCE: THE 'CARE → CAUSE → CORRECT → CAPABILITY' LEARNING LOOP

STAGE: PURPOSE

**CARE**  
(Save lives)

**CAUSE**  
(Understand why)

**CORRECT**  
(Fix system)

**CAPABILITY**  
(Train people better)

**MATURE SAFETY GOVERNANCE**

"We must treat road crashes the way aviation treats aircraft incidents — immediate rescue, scientific investigation, systemic correction, and continuous training. That is how nations move from accident response to safety management."

## POST-CRASH SURVIVAL & SYSTEM LEARNING – THE NEXT FRONTIER

Crashes will reduce, but survival after crash must improve dramatically.

**1 PARAMEDIC CAPABILITY GAP**  
**CHALLENGE:** Lives lost due to improper first handling.  
**DIRECTION:** National trained paramedic pool, Tele-doctor grid for real-time guidance.  
**QUOTE:** "Golden hour care should not depend on which district the crash happened in."

**2 AMBULANCE AVAILABILITY – UBERISATION MODEL**  
**CURRENT:** Limited fleet, location mismatch.  
**PROPOSED:** Crowdsourced grid, nearest vehicle auto-dispatched, hospital pre-assigned.  
**QUOTE:** "The closest life-saving vehicle should respond — not just the government vehicle."

**6 DOCTOR CROWDSOURCING NETWORK**  
Specialist doctors on-call grid, supporting paramedics remotely, especially in rural/highway areas.

**4 REWARDING GOOD SAMARITANS**  
Incentivize reporting and assisting. Remove fear, add recognition. Safety becomes socially rewarded behaviour.

## SYSTEMIC LEARNING & PREVENTIVE ACTION

**3 BEHAVIOURAL NUDGING ON HIGHWAYS**  
Corridor-specific accident boards with real crash data. Turns statistics into emotional signals.

**5 PUBLIC FATALITY COUNTER**  
Like pollution AQI/Covid dashboards.  
**Purpose:** Build awareness, create accountability pressure, make safety a public issue.

**7 CRASH RECONSTRUCTION SYSTEM**  
Aviation-style investigation: Witness input, camera analytics, root cause identification, engineering/policy feedback.

**8 ROAD CRASH INVESTIGATION AGENCY**  
Under national DG Road Safety. Structural reform similar to Aircraft Accident Investigation Bureau & Railway Safety Commissioner.

**9 AI-BASED GAMIFIED TRAINING**  
Simulated scenarios, skill gap detection for Paramedics, Control room staff, Traffic police, Highway patrol. Builds human capability.

**THE STRATEGIC SHIFT: From Reaction to Prevention & Learning**

Venkat Chunduru

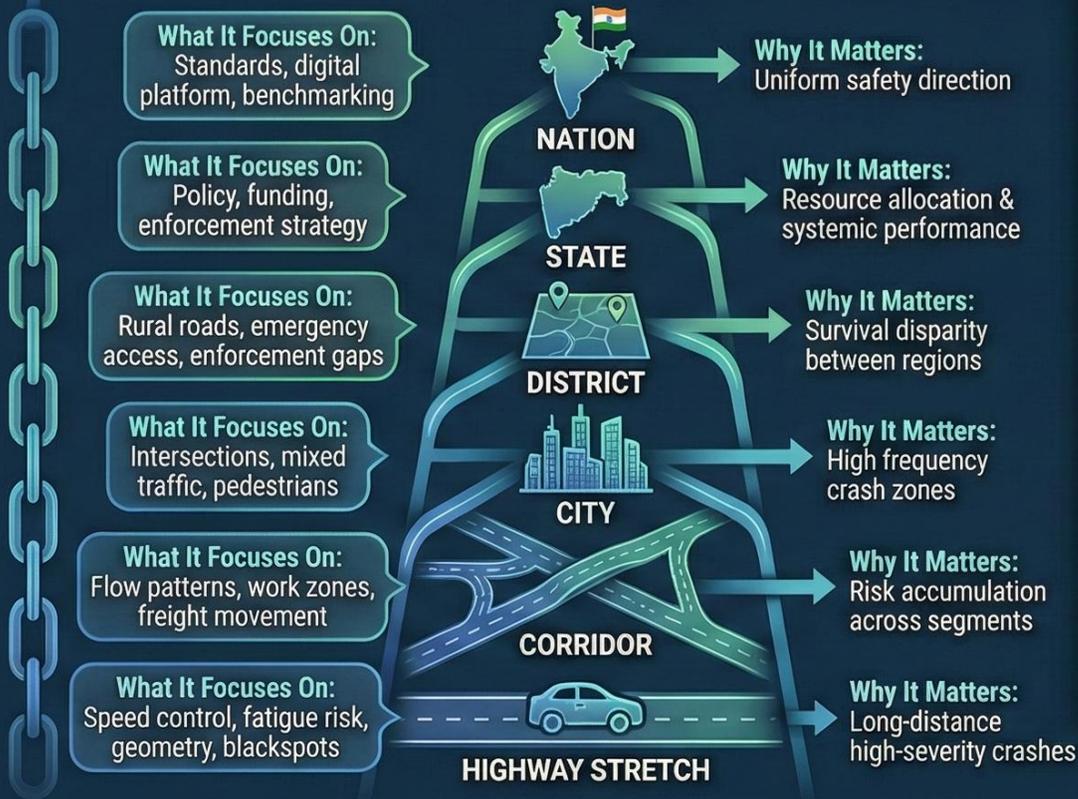

FROM Fragmented Efforts → TO Coordinated National System

FROM Data Silos → TO Integrated Platform

FROM Accident Response → TO Mature Safety Governance (Care→Cause→Correct→Capability)

Safety Must Be Managed Like a Distributed System

## 1 GOVERNANCE ACROSS SPACE (Geographical Scales)

"If one layer fails, the safety chain breaks."

## 2 GOVERNANCE ACROSS TIME (Cyclical Review & Adaptation)

"To manage risk, we must see where it exists and when it peaks. Road safety governance must work across space and across time."

"Crashes follow patterns – weather, festivals, traffic cycles. Governance must follow the same rhythm."

### WHY THIS MATTERS: BHARAT Way

#### Traditional Model:

Annual reporting | Centralised only | Static review

#### BHARAT Way:

Continuous monitoring | Multi-level accountability | Dynamic adaptation

"Safety is not a one-time audit. It is a distributed governance system operating across geographies and time cycles."

# THE BHARAT WAY: ROAD SAFETY ROOTED IN CIVILIZATIONAL THOUGHT

“Not borrowed, but rooted in our own civilizational thought. Protecting life is dharma, managing risk is statecraft, and acting to prevent harm is karma.”

## Triveni Sangam

### 1 DHARMA: Citizen Responsibility

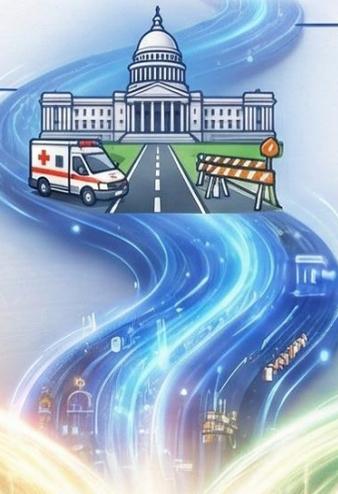

**VALUE SYSTEM:**  
Self-Discipline,  
Empathy. Shift from  
Compliance to  
Moral Obligation.  
“Protecting life is an  
inherent duty.”

Self-regulation  
Respect for others  
Helmet/Seatbelt as duty

### 2 STATECRAFT (Rajdharm): Institutional Integrity

Safe Infrastructure  
Emergency Response  
Swift Enforcement

**GOVERNANCE:**  
Sovereign Guarantee.  
Shift from Departmental  
Activity to Protection Duty.  
“State must guarantee  
safe passage like  
borders/health.”

## THE BHARAT WAY: ROAD SAFETY AS NATIONAL DUTY

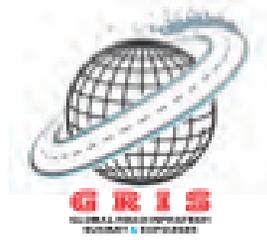

### 3 KARMA: Scientific Action

**ACTIONABLE SCIENCE:**  
Cause & Effect. Shift  
from Fate/Accident to  
Accountability/Prevention.  
“Positive actions inevitably  
lead to saved lives.”

Data-Driven Insights  
AI & Prediction  
Preventive Engineering

“Saving an Indian life on the road is as patriotic as defending the border.  
A transition where safety is embraced as a natural duty to the nation.”

## Managing road safety the BHARAT Way means —

**Every INCIDENT is logged, so we LEARN from every life lost.**

**Every EFFORT is synchronised, so departments do not work in isolation.**

**Every STAKEHOLDER is aligned, from police to hospitals to NGOs to citizens.**

**Every SYSTEM is integrated, through a common digital backbone.**

**And every CITIZEN is aware, because safety is not only a government function  
— it is a societal responsibility.”**

**Global Road Infratech  
Summit & Expo**
